# ANDREJ ATANASOVSKI

Skopje, North Macedonia | +389 76-949-363 | andrej.atanasovski.00@gmail.com

**Social Links: Portfolio | GitHub | LinkedIn**

## Professional Experience

| **Full Stack Developer** | Feb 2023 – present |
|---|---|
| **Vitech Development** | Skopje, MK |

- Building many full stack applications for all purposes, with JavaScript, Node.js, GraphQL, PostgreSQL on the backend, and JavaScript and Vue.js on the frontend. Also, implementing AI features in our software products.

| **BSS Operations Specialist** | Jun 2022 – Dec 2022 |
|---|---|
| **A1 Macedonia** | Skopje, MK |

- Responsible for ensuring availability and performance of the databases that support the system. Responsible for troubleshooting and problem solving of SQL queries with proactively monitoring the database systems.

| **Data Analyst Intern** | Feb 2022 – Jun 2022 |
|---|---|
| **A1 Macedonia** | Skopje, MK |

- Analyzing and organizing data and marketing results. Creating and optimizing prediction models with Machine Learning Algorithms, where I worked on two prediction models: one for Improving Sales and one for Fraud Prediction Model.

## Education

| **Bachelor of Science at the University "Ss. Cyril and Methodius" (UKIM) of Skopje - Faculty of Electrical Engineering and Information Technologies (FEIT)** | Oct 2018 – Nov 2022 |
|---|---|
| - Computer Systems Engineering, Automation and Robotics | Skopje, MK |

| **High School Graduate at SOU "Josip Broz Tito" Bitola** | Sep 2014 – Jun 2018 |
|---|---|
| - Intensive Mathematics and Computer Science Studies | Bitola, MK |

## Projects

Worked on different Full Stack projects at my company which I won't share here, both on the frontend (mainly with JavaScript and Vue.js) and on the backend (Node.js, GraphQL, PostgreSQL). I also have implemented AI features in our projects, with the Amazon Titan Multimodal Model and OpenAI API.

*Some personal projects I have made which you can find on my Portfolio and my GitHub:*

- Netflix Clone Website - Movies website made with TMDB (The Movie Database) API, where the movies are divided into subcategories, and you can watch trailers of those movies.
- Movie Playlist – interactive website made with React.js, used for searching any movie you like.
- Simple JavaScript Projects – Tip Calculator, Fighting Game, Rock-Paper-Scissors Game.
- Machine Learning Models.

## Technical and Computer Skills

JavaScript, Node.js, Vue.js, React.js, Python, AI tools and LLMs, HTML & CSS, MySQL, C++, Git, Bash, Linux OS, Excellent knowledge with all MS Office tools, Experience in Web services, XML, SOAP
